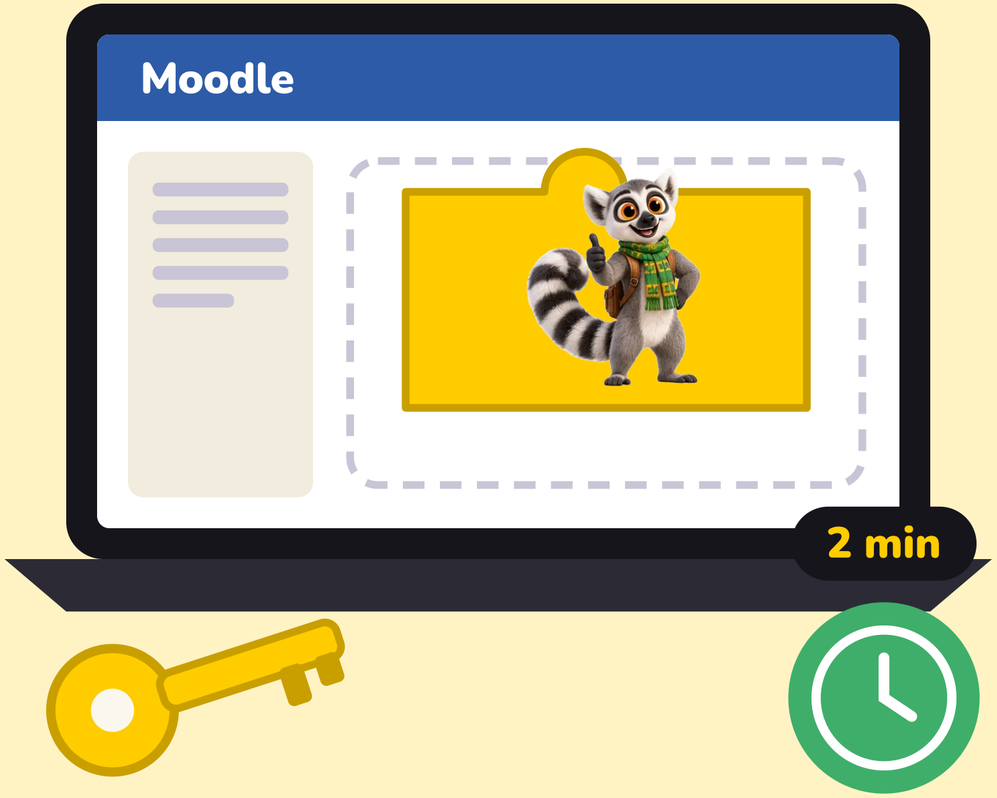
Zaza: school and home, even without internet

Lessons, quizzes and follow-up, in class and at home.

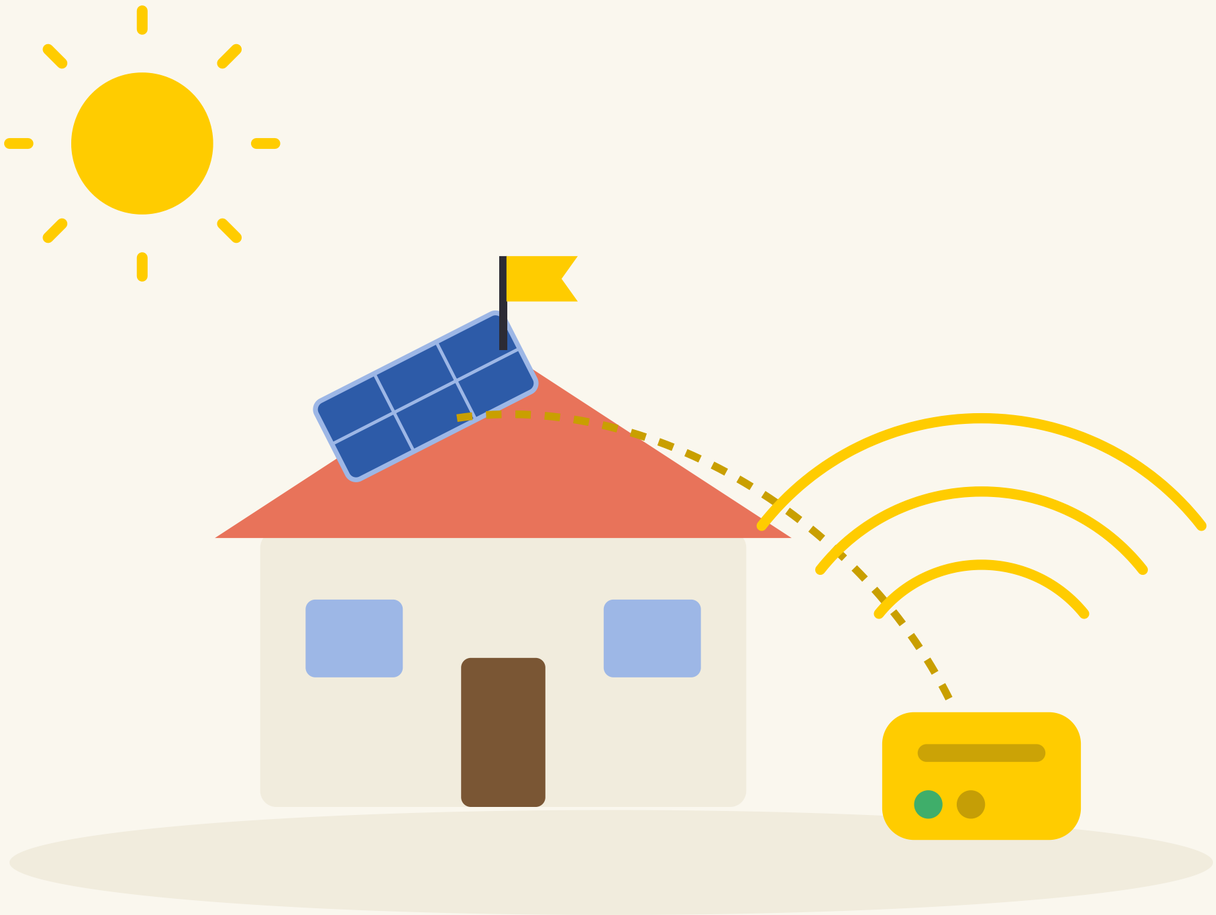
Zaza in your Moodle

Online and offline: one module, one key, and you’re ready.



Our box or yours

Our solar box or your existing ones:
set up, with training, by our team.



Teachers stay in charge

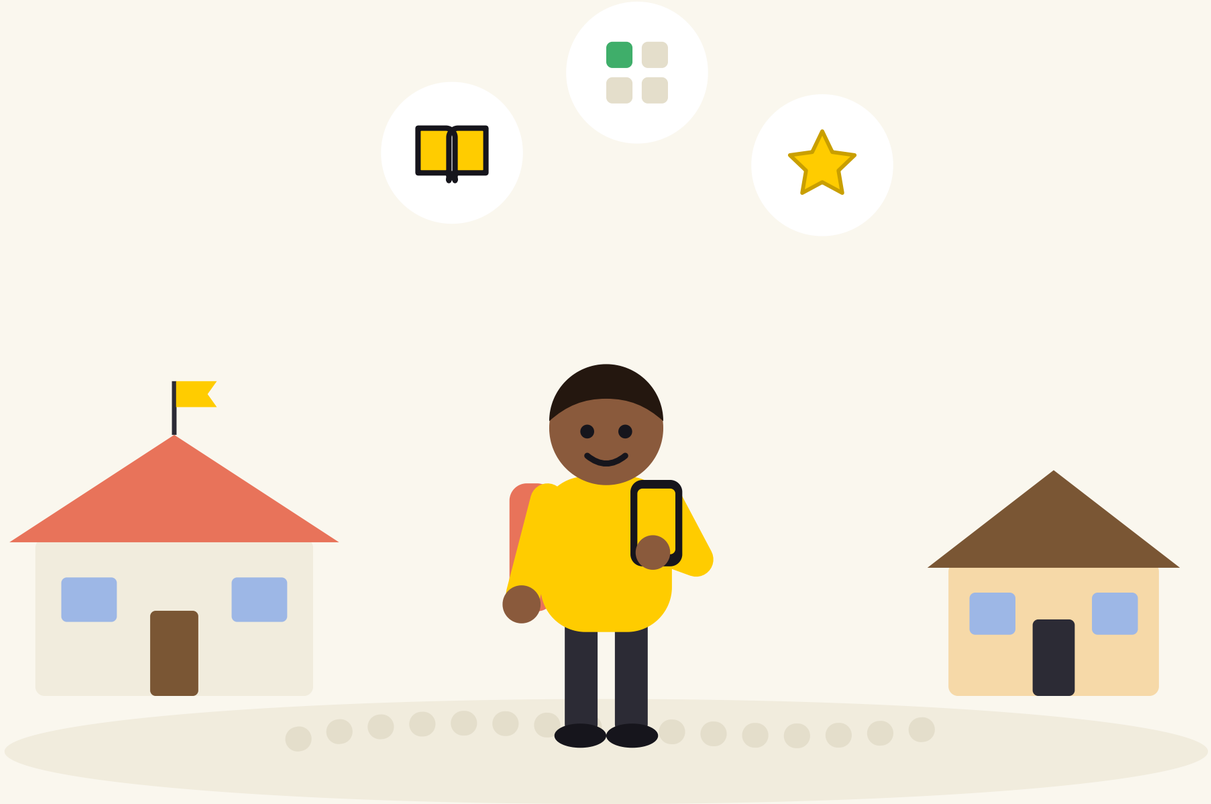
The national curriculum or their own lessons: they review, then publish.

Every child connects

Phone or tablet, no data plan, no mobile network.

Lessons travel home

The offline Moodle mobile app keeps lessons and quizzes.

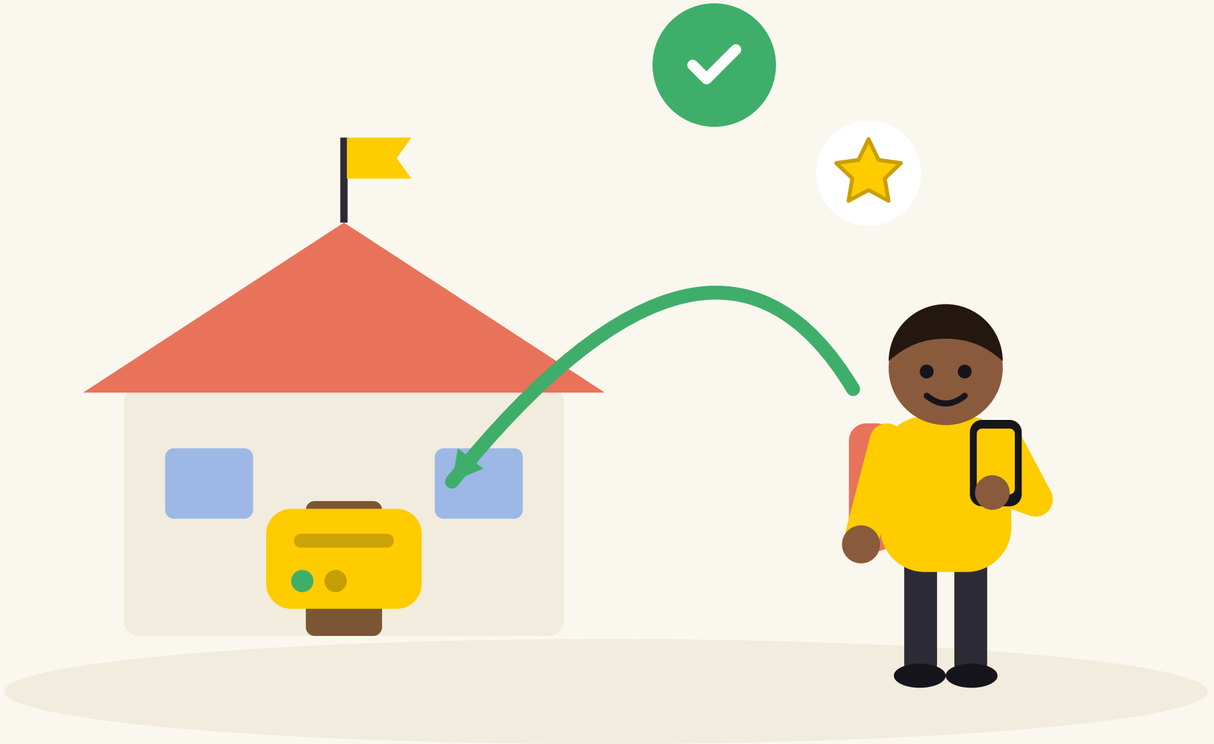


Home becomes a classroom

Zaza answers questions and picks the right revision every day.

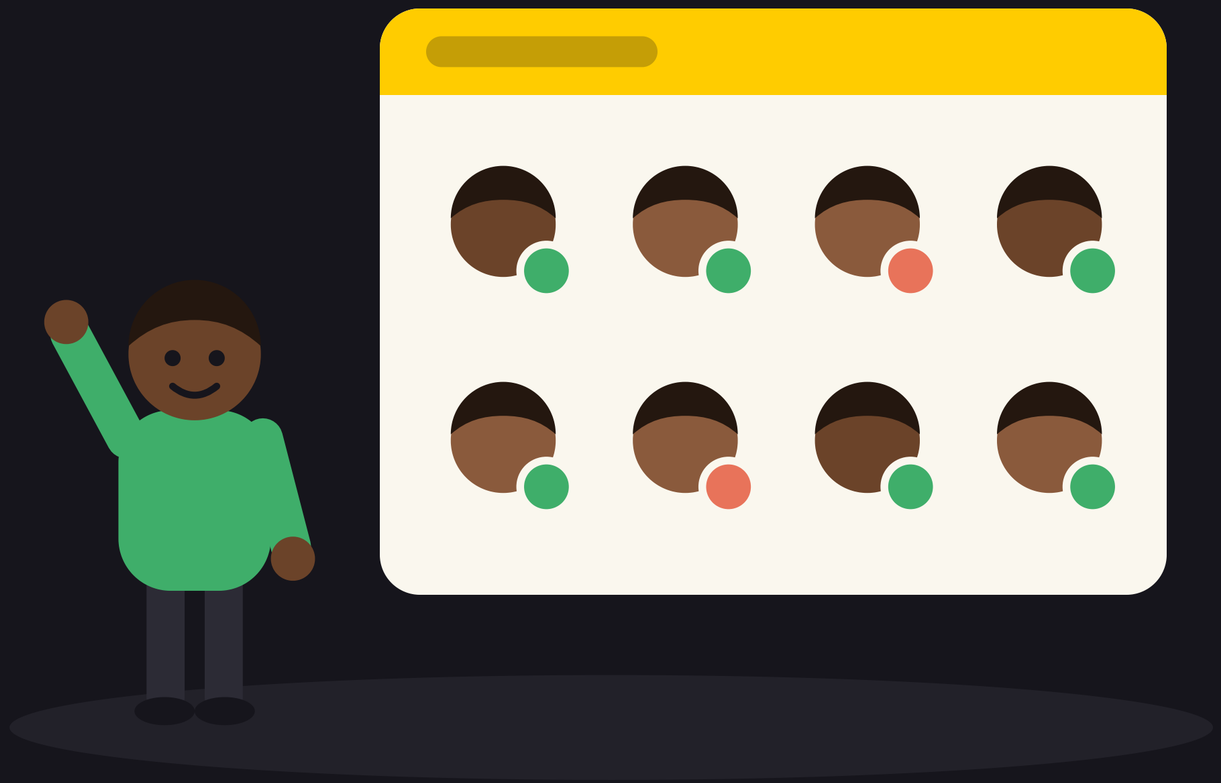
Progress comes back to school

Even offline, everything counts and syncs back.



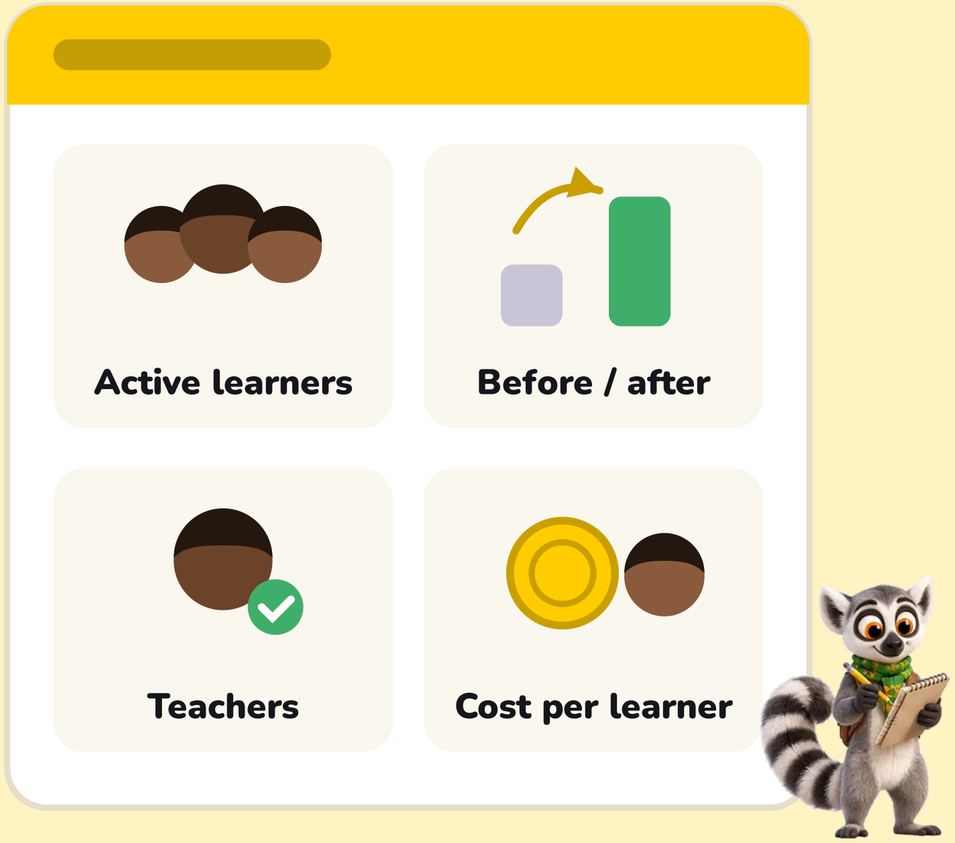
Teachers see who needs help

Green, on track; amber, needs a nudge.



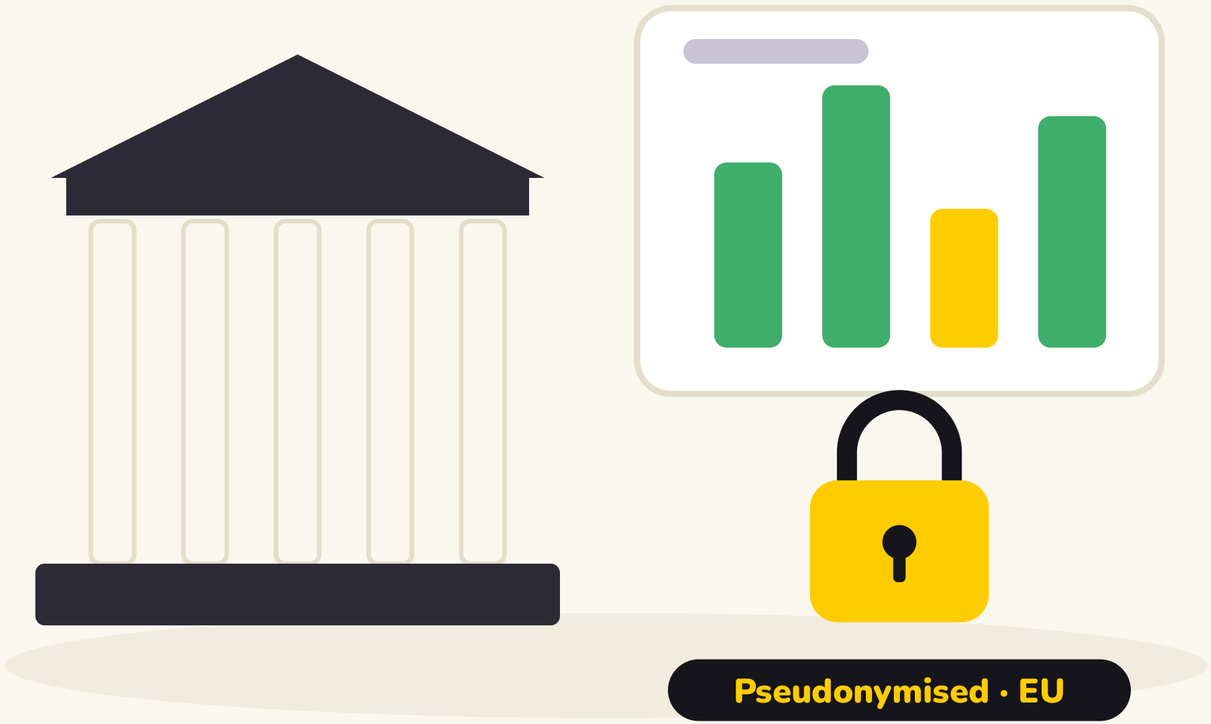
Clear reports for funders

Indicators agreed with you: active learners, progress, cost per learner.



Your data stays yours

Pseudonymised, hosted in the EU, deleted on request.

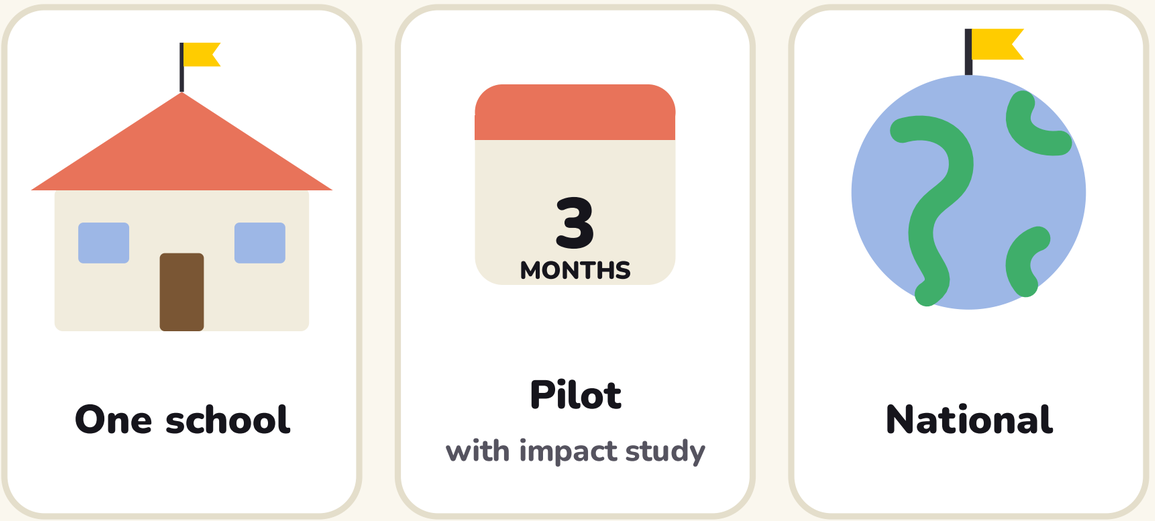


Villages, camps, training centres

Wherever learning needs it most.

Pilot, school or national

On quotation, with a day to learn to import and publish content.



Let’s try it together

Ten questions, no sign-up, right now (in French).

Try Zaza now (in French)
